DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 27-34 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. patent No. 4,885,490 to Gardano et al. (Gardano).

Gardano teaches a process for the hydrogenation of bis-phenols by reacting bis-phenols with hydrogen in the presence of a catalytic system consisting of palladium supported on activated carbon. Water is present, see column 3, lines 19+.

Claims 90 and 91 are rejected under 35 U.S.C. 102(b) as being anticipated by DE4203351 (DE 351), see attached DERWENT citation.

DE 351 teaches hydrogenating linear or branched, cyclic or open-chain dienes with H₂ at 0-150 C and 800-1500 hPa in the presence of a catalyst system containing a Pd salt and water.

Claim 92 is rejected under 35 U.S.C. 102(b) as being anticipated by GB 212066 (GB 666).

GB 666 teaches that perhalogenated terephthalonitriles are converted to the corresponding diamine by hydrogenation in the presence of a hydrogenation catalyst

under acid conditions, see abstract. The catalyst can be palladium on charcoal, see page 1, line 28. Water is present, see abstract.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 89 is rejected under 35 U.S.C. 103(a) as being unpatentable over GB 212066 (GB 666).

GB fails to explicitly teach the specific reaction set forth in claim 89. However, those of ordinary skill would have been motivated to modify the disclosure of GB 666 to include the specific reagent in order to provide the desired compound. Therefore Gb 66 renders claim 89 prima facie obvious since this patent teaches or suggest the elements of the rejected claims with a reasonable expectation of success.
